

List of FSX and P3D Controls, in Numerical Order

NOTE: FSUIPC5 users should refer to the Text file list produced automatically when FSUIPC is run and it detects a new edition of P3D4. This will also be found in the FSUIPC Documents folder, with the name:

Controls List for P3D4 Build xxxxx.txt

Where 'xxxxx' is the build number of the version of P3D4 installed. The file includes both numerical and alphabetically sorted lists. Of course, like the current list, it does *not* include controls added by FSUIPC (see the Advanced guide for those), or the additions relating to your Lua plug-ins and Macro files.

KEY:

RED = P3D Version 3 and later only

GREEN = FSX* and FSX-SE only

BLUE = FSX*, FSX-SE and P3D version 2 only

* FSX ACCeleration (some don't apply before)

PURPLE = P3D Version 2 only (maybe only 2.5)

BROWN = P3D only (not FSX or FSX-SE)

BLACK = All*

List of P3D version 3 Controls, in Alphabetic Order

NOTE: FSUIPC5 users should refer to the Text file list produced automatically when FSUIPC is run and it detects a new edition of P3D4. This will also be found in the FSUIPC Documents folder, with the name:

Controls List for P3D4 Build xxxxx.txt

Where 'xxxxx' is the build number of the version of P3D4 installed. The file includes both numerical and alphabetically sorted lists. Of course, like the current list, it does *not* include controls added by FSUIPC (see the Advanced guide for those), or the additions relating to your Lua plug-ins and Macro files.

KEY:

RED = P3D Version 3 and later only

GREEN = FSX* and FSX-SE only

BLUE = FSX*, FSX-SE and P3D version 2 only

* FSX ACCeleration (some don't apply before)

PURPLE = P3D Version 2 only (maybe only 2.5)

BROWN = P3D only (not FSX or FSX-SE)

BLACK = All*
